Digital Bill of Lading Starter Kit

Tools & Systems for a Successful Rollout

The shift to electronic Bills of Lading isn't just a tech upgrade — it's a step toward a more agile, connected future for steel distribution. Most businesses already have the foundation. What's needed now is a smarter way to bring it together.

This starter kit outlines the essential components steel distributors need to successfully implement Digital Bill of Lading — with minimal disruption, using tools that are already familiar.

What You Actually Need to Get Started with Digital Bill of Lading

Core Tools & Systems Checklist

Component		What You'll Need
ERP System		Your existing ERP (e.g., NetSuite, QuickBooks, Steel-Specific Platforms) with fields or templates to support BOL generation.
Digital Bill of Lading Generator		A configurable Bill of Lading format that pulls data directly from orders in your ERP.
Driver Mobile Device		Tablet or smartphone (iOS or Android) with basic Wi-Fi or 4G to support signature capture and syncing.
Signature Capture App		Tool to digitally collect driver and customer signatures on-site (can be custom or integrated).
Digital Bill of Lading Sync Setup		Light configuration that connects your delivery events to the ERP and invoicing system.

Implementation Insights

01 — No ERP Replacement Required
Digital Bill of Lading can be integrated with your current system — no need for major rework or new software.

02 — Customer-Ready
Most customers welcome digital confirmation — faster processing, cleaner records, fewer disputes.

03 — Minimal IT Load
eMoksha handles system mapping, signature workflows, and document syncing — so your teams can stay focused on operations.

04 — Start Small, Scale Fast
Pilot with one driver, one location, or a single product category. Once stable, expand in phases.

Final Thought: You're Closer Than You Think

If your business can print a Bill of Lading and your drivers have access to mobile devices, you're already well on your way. eMoksha bridges the final mile — helping you connect the dots between documentation, and real-time delivery visibility.
