

eMoksha
A DATA SCIENCE COMPANY

DEMAND PLANNING SERVICE

Inventory Optimization and Forecast Accuracy Improvement

Demand Planning is a

- Cloud-based service
- Predicts what, when and how much to order from supplier
- Optimizes inventory
- Enhances supply chain planning
- Timely customer order fulfillment

DISTRIBUTOR CHALLENGES

Lost sales
because of
stockouts

Capital
tied up in
inventory

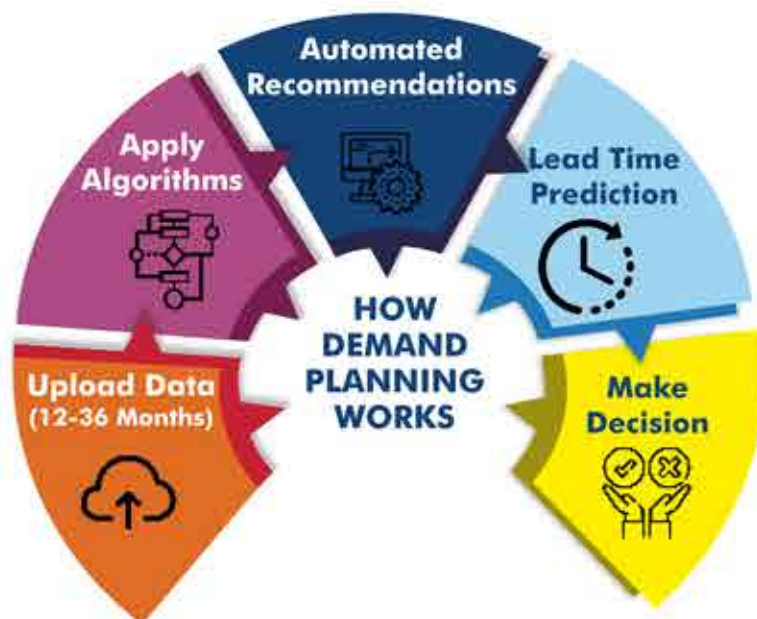

Tedious
Manual
Processes

“

eMoksha Demand Planning has completely transformed how we order steel. A tedious and frustrating process which used to take days with pouring over excel files, purchase orders and not to mention 'gut' feel of warehouse staff is now a point and click, 30-minute exercise with pin-point accuracy. We are saving so much money, time and effort with Demand Planning.

- Melissa Supler
Chief Operating Officer, Lyman Steel
