

BUILT FOR SMALL TO MEDIUM SIZE STEEL AND METAL FABRICATORS / DISTRIBUTORS

Steel & Metal Distribution Platform

A steel distribution ERP system that eliminates all the process complexities, bells, and whistles of a full-suite ERP. This ERP tailors to a very specific workflow inside a small to medium size steel fabrication/distribution center. The system allows a 2-3 person team to smartly manage the entire life cycle of ordering steel, managing inventory, suppliers, and cash resulting in speed, efficiency, and cost savings with minimal manpower need. Empower your business by being smart and doing more with less.

Key Features

01

Order Entry

Manage order entry, shipping, customer invoicing and payments

02

Supplier Management

Manage supplier information, supplier orders, supplier payments

03

Accounting

Timeclock entry, payroll, customer and supplier invoicing, payments

04

Customer Management

Manage master customer data, names, address, billing information, customer locations, shipping destinations

05

Inventory Management

Track and manage inventory, inventory planning

06

Complete Automation

Warehouse automation with barcode scanning & Quickbooks automation with automated data transfer from ERP

Predictive Capabilities

Lead time prediction

Demand forecasting

Sales forecasting and planning

Pricing optimization and forecasting

Cost optimization

Key Aspects

- AI first approach
- Built to automate
- Built for speed
- Built to improve efficiency
